

Since 1955, **BWG Bergwerk- und Walzwerk-Maschinenbau GmbH** has been renowned worldwide for its high-quality products and innovative technological solutions for the metallurgical industry. The internationally successful company specializes in mechanical engineering and rolling mill technology, with a scope of supplies and services that includes the planning, design, construction and on-site commissioning of turnkey installations of strip processing lines, rolling mills and other special machinery. In close cooperation with our customers, we translate the customer's requirements into innovative and cost effective solutions that lead to facilities which produce material of better quality, with increased productivity and energy-efficiency while being responsible stewards of the environment. For many years, **BWG** has been a reliable partner to the leading producers of steel, aluminium and other non-ferrous metals. **BWG's** international success is due to the knowhow, personal commitment and loyalty of its employees.

For our construction sites in Germany and abroad, we are looking to fill an immediate opening for an

Engineer for Installation Supervision and Commissioning of Automation and Drive Technology

Your field of activity would comprise:

- Installation supervision
- Assistance during commissioning of automation and drive technology
- Site management
- Carrying out upgrades, repair and maintenance work
- Support after the successful commissioning of the supplied equipment
- Short-term service deployments

Your profile:

- Successfully completed studies of electrical engineering or mechatronics
- Experience with electrical engineering and drive technology conception
- Knowledge of standard drive and control systems
- Flexibility and a willingness to travel extensively for short- and long-term stays all over the world
- A high level of commitment and dedication, capacity for team work and excellent communication skills
- A good command of written and spoken German and English

We are happy to also review applications from graduated electrical engineers (m/f) with work experience who would like to train in this diversified assignment.

We offer an in-depth view on all relevant areas. We will promote your individual talents and, after a training period, will assign you exciting and challenging tasks in an international environment and at attractive conditions.

Did we spark your interest? Then we look forward to hearing from you.

Please send your complete application to:
